DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 re allowed.

The following is an examiner's statement of reasons for allowance:

The references cited do disclose a high-frequency circuit comprising: a substrate having an electronic component, a first ground pattern; a micro-strip line formed on the obverse side of the substrate; and a bias line connected to the electronic component on the obverse side of the substrate, for example, Kosuke (JP-2002-164701, submitted by applicant) discloses a high frequency circuit comprising a substrate (20) having a bias line (16), a transmission line (14) formed on the substrate, a grounding layer (18) formed on a bottom surface of the substrate (20), Inagawa (U.S. Patent 5,777,277) does disclose a printed circuit board (PCB) comprising first and second ground layers (13, 18) formed on a top and bottom surfaces of the PCB (10), a power source line (bias line, 17) formed on the top surface of the PCB, a chip jumper (48) formed on a solder resist (47) to separate two ground portions (43a, 43b), Sakuragawa et al. (U.S. Patent 5,907,265) teaches a high frequency circuit device related to a mobile communication equipment. However, they do not disclose or obvious suggest in combination of the high frequency circuit having a portion of the first ground pattern that circumvents the bias line on the reverse side of the substrate is continuously formed on the obverse side of the substrate as a second ground pattern so ms to divide the microstrip line in two

parts; and a chip jumper is arranged to bridge the two divided parts of the microstrip line over the second ground pattern so as to connect the divided microstrip line electrically.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kohjiro et al., Sakuragawa et al., and Inagawa disclose related art.
